CASE STUDY:

Expert Electrical – Head Office – Brendale

38.28KW Grid Tied Warehouse / Office /

Showroom

Expert Electrical was paying \$1000-\$1500 Quarterly for electricity we decided to deliver our own 38.28KW grid connected solar PV system for our recently renovated Head Office in Brendale, QLD”

This custom engineered solar power system has 132 x Longi 290W Solar Panels and 2 x German made SMA Solar 15KW Inverters. It covers approx. 217 m2 of roof space. Expert Electricals team worked relentlessly to deliver this project in 3 days. We are benefitting from Net Zero Carbon Emissions, Electricity earnings rather than costs and greatly improved thermal dynamics because the Solar Panels are acting as another layer of insulation for the building.
